Profile

Certified Ethical Hacker Master (CEH Master) with additional certifications, including PNPT, eJPTv2, and eWPT. I specialize in identifying and mitigating security vulnerabilities across web applications, wireless networks, and APIs. Proficient in leveraging tools like Metasploit, Nmap, Wireshark, and Burp Suite, coupled with hands-on experience in Linux environments and Bash scripting. A proactive learner, I continuously enhance my skills through self-study, structured training, and active participation in Capture The Flag (CTF) competitions on platforms such as Hack The Box and TryHackMe. My analytical mindset and problem-solving abilities equip me to tackle complex cybersecurity challenges effectively.

Skills

| | |
|--|--|
| Networking Knowledge (TCP/IP, DNS, DHCP) etc | |
| OWASP Top 10 | |
| Web Application Security & API Security | |
| Network Security | |
| Programming Language: Python, Bash | |
| Linux (Debian, Arch) | |
